1.1. Executed Test Cases

Defects

1.2. New defects

Defect ID	Defect summary	Severity
0041117 B	Account: Create account with incorrectly/ incompletely email address	major
0041122 B	Account: Unable to log in or create account with Facebook	major
0041307 B	Orders-Orders history-"Comanda rapida"-When a quick order is placed, the previous order is doubled	normal
0041159 B	Orders: Unable to find order by order number	major
0041549 B	Search-Products on the site, not found with "Cauta in site"	normal
0041311 B	Search-Existing products on the site, not found with "Cauta in site"	major
0041548 B	Search-Existing products on the site, not found with "Cauta in site"	major
0041544 I	Shopping cart- Number of products not accepted - Message not displayed	normal
0041416 I	Shopping cart - Delete all products - 0 is not accepted as a value	normal
0041408 I	Wishlist- After the product is added to the cart, the wishlist is not updated	normal
0041151 B	Wishlist: If double-click on the same product, the product is removed from the wishlist	major
0041156 I	Products: Incompletely emailing product	normal
0041310 I	Product on the page-product described incorrectly	normal
0041308 I	Product on the page-spelling mistake	normal
0041306 I	Products: Unable to select product colour	normal
0041120 B	Complete the order: The order can be placed even if the delivery address is invalid	major
0041547 B	Complete the order: order completion with invalid email address	normal
0041118 B	Complete the order: New account can be created with an invalid phone number	normal
0041121 B	Complete the order: Order can be placed with the value below the minimum displayed on the site	normal
0041152 B	Filters: Wrong price filtering	normal

Defect ID	Defect summary	Severity
0041157 I	Filters: Only one manufacturer in the "Manufacturers" filter	normal
0041312 I	Filters-The number of products is not the same in the manufacturers filter as the number of products in the price filter	normal
0041154 I	Leave a reviews: Reviews are not registered	normal

1.3. Validated bugs

No Bugs are validated.

1.4. Old bugs still open

There are no old bugs still open.

Conclusions

Test Cases for the main functionalities in a percent of 100% were executed, 41.43% passed and 58.57% failed. Most of the failed test cases are related to the "Produsul pe pagina" and "Finalizeaza comanda" functionalities.

A total number of 23 new defects were identified, 13 bugs and 10 improvements. 7 of the bugs were identified as major severity and 6 as normal severity. No bugs were validated. The improvements were identified have normal severity.

The most frequent testing types applied were Functional Testing, Exploratory, Compatibility, Negative, UI, Usability.

Exploratory testing was performed for important functionalities. Most of the defects were improvement and were related to the aesthetics and the writing of the text.

Most of the bugs were identified by performing Negative Testing.

Compatibility testing was also performed, for different browsers and devices. The bugs could be reproduced on all browsers.

Considering the number of high severity bugs detected on important functionalities, the fixing of at least the major severity bugs is recommended. Going live with this website was a decision that could harm the marketing image of the company, the identified bugs having a negative impact especially on the customers shopping experience.

From my point of view a lot of improvement is needed.
